

# SILEX CLICKSHOW Y202/Y404 UPGRADE

## Silex ClickShow Y202/Y404 V3.3.5

To upgrade your ClickShow device, download the latest software version first. Every software upgrade includes a Kernel version and an OS version.

Click on the following link to download both the latest Kernel and OS version :

<https://bit.ly/2XDjBvF>

The Kernel version name looks like this: ulmage-2K.bin

The OS version name looks like this: rootfs-2K-ESHOW.jffs2

You can upgrade your ClickShow system via USB or via the Configurator as explained in the [ClickShow Y202/Y404 Users Guide](#). If you choose to upgrade via the configurator, you should upgrade the Kernel version first. After the system reboot, upgrade the OS version.
